Important Kaiser Permanente Medicare health plan information

January 15, 2025

RS

Marlys I Svensson Apt 268 4015 164th St Sw Lynnwood WA 98087

Notice of Dismissal of Coverage Request

Date: January 15, 2025 Member ID Number: 00068164

Name: Marlys I Svensson Reference Number: 4116370188

Date of Birth: 09/17/1939

Dear Marlys I Svensson:

This letter is to inform you of our decision to dismiss a pending request (referral). On 01/15/2025 we received a referral from Marius L Laumans for:

Procedure	Procedure	Requested	Procedure	Modifiers	Revenue	Revenue
Name	Code	Quantity	Type		Code	Code Name
WHEELCHAI	K0001	13 (1/Month	HCPCS	RR	N/A	N/A
R		x 13)				
STANDARD		,				

Medicare rules require that we send you this letter in certain situations, such as when a provider withdraws a request. There is no action required from you on this notice. See instructions below if you disagree with our decision to dismiss your coverage request.

This dismissal does not apply to existing authorizations for services and medical equipment.

We will not continue the review of the request through our authorization process (initial determination).

The request has been dismissed

We made the decision not to review the request for medical services/items listed above because you or your doctor asked to withdraw or cancel it prior to a decision being made.

If you disagree with our decision to dismiss your coverage request, you have two options:

If you think we have incorrectly dismissed your coverage request (for example, you believe this request was withdrawn or cancelled in error), you may request that we review our dismissal. Your request must be received by us at

Toll Free: 1-888-901-4600 TTY users call: 1-800-833-6388
 Monday–Friday: from 8 a.m. to 8 p.m. or

P.O. Box 34589

Seattle, WA 98124-1589

Include a copy of this **Notice of Dismissal of Coverage Request** along with any supporting information with your request and explain why you believe the dismissal was incorrect.

You may request that we vacate (set aside) the dismissal action. If we determine there is good cause to vacate the dismissal because this request was withdrawn or cancelled in error, we will vacate our dismissal and review your coverage request. Your request to vacate this dismissal must be received by our office at

KAISER PERMANENTE NONDISCRIMINATION NOTICE

Kaiser Foundation Health Plan of Washington and Kaiser Foundation Health Plan of Washington Options, Inc. ("Kaiser Permanente") comply with applicable federal civil rights laws and do not discriminate, exclude people, or treat them differently on the basis of race, color, national origin, age, disability, sex, sexual orientation, gender identity, or any other basis protected by applicable federal, state, or local law. We also:

Provide free aids and services to people with disabilities to help ensure effective communication, such as:

- Qualified sign language interpreters
- Written information in other formats (large print, audio, and accessible electronic formats)
- Assistive devices (magnifiers, Pocket Talkers, and other aids)

Provide free language services to people whose primary language is not English, such as:

- Qualified interpreters
- · Information written in other languages

If you need these services, contact Member Services at 1-888-901-4636 (TTY 711).

If you believe that Kaiser Permanente has failed to provide these services or discriminated in another way on the basis of race, color, national origin, age, disability, sex, sexual orientation, or gender identity, you can file a grievance with our Civil Rights Coordinator by writing to P.O. Box 35191, Mail Stop: RCR-A3S-03, Seattle, WA 98124-5191 or calling Member Services at the number listed above. You can file a grievance by mail, phone, or online at kp.org/wa/feedback. If you need help filing a grievance, our Civil Rights Coordinator is available to help you.

You can also file a civil rights complaint with:

• The U.S. Department of Health and Human Services, Office for Civil Rights electronically through the Office for Civil Rights Complaint Portal, available at https://ocrportal.hhs.gov/ocr/portal/lobby.jsf, or by mail or phone at: U.S. Department of Health and Human Services, 200 Independence Avenue SW., Room 509F, HHH Building, Washington, DC 20201, 1-800-368-1019, 800-537-7697 (TDD) Complaint forms are available at http://www.hhs.gov/ocr/office/file/index.html

• The Washington State Office of the Insurance Commissioner, electronically through the Office of the Insurance Commissioner Complaint portal available at ttps://www.insurance.wa.gov/file-complaint-or-check-your-complaint-status, or by phone at 800-562-6900, 360-586-0241 (TDD). Complaint forms are available at https://fortress.wa.gov/oic/onlineservices/cc/pub/complaintinformation.aspx

Subject: Wheelchair.

Hello, I am not sure if you are aware that this patient is approved to Apria for the W/C. It was ordered by Dr. Sylte. This item must be provided by Apria as our exclusive provider. Apria Everett is the closest. This request will deny, unless we can update the provider to Apria. Apria Everett would be the location for pickup, same city as Bellevue Healthcare, besides I believe Apria can deliver the wheelchair. I hate for the patient to receive a denial letter. Let me know and this can be withdrawn.

Other (please describe)

rensson, Marlys I (MRN 00068164)	
What type of service is being requested?	None of the Above
Type of Request	
What is being ordered?	
Has the patient been diagnosed with	
an infection or injury of the perineal	
area and the sitz bath is part of a	
planned regimen of home care	
treatment?	
Is the patient confined to a bed?	
What type of brace is being ordered?	
Select the device being ordered:	
Does the patient have a nonunion of a	
long bone fracture defined as	
radiographic evidence that fracture	
healing has ceased for three or more	
months prior to starting treatment	
with the osteogenesis stimulator?	
Does the patient have a failed fusion	
of a joint other than in the spine where	
a minimum of nine months has	
elapsed since the last surgery?	
Does the patient have congenital	
pseudarthrosis?	
Has the patient had a failed spinal	
fusion where a minimum of nine	
months has elapsed since the last	
surgery?	
Has the patient had a multilevel spinal	
fusion surgery?	
Has the patient had a failed spinal	
fusion surgery where there is a history	
of a previously failed spinal fusion at the same site?	
Does the patient have a nonunion	
fracture and a minimum of 2 sets of	
radiographs prior to treatment with	
the osteogenesis stimulator?	
Are the radiographs separated by a	
min of 90 days with each including	
multiple views of the fracture site, and	
has a written interpretation stating no	
clinically significant evidence of	
fracture healing between the two sets	
or radiographs?	
Is the fracture at a site other than the	
skull or vertebrae?	
Is the fracture not related to a tumor?	
Has the patient had a total knee	
replacement?	
Is this device being prescribed for use,	
nor more than two days from the	

ensson, Mariys I (MKN 00068164)	
surgery date and for no longer than 3 weeks post surgery?	
Is this being prescribed for treatment	
of contractures?	
Has the patient had a recent injury or	
surgery that requires both medial and	
lateral rotation control?	
Does the patient have documented	
knee instability/joint laxity?	
What device is being ordered?	
Does the patient have weakness or	
deformity of the foot and ankle?	
Does the patient require stabilization	
for medical reasons?	
Does the patient have the potential to	
benefit functionally?	
Does the patient require knee stability?	
Does the patient have plantar flexion	
contracture of the ankle with	
dorsiflexion on passive range of	
motion testing of at least 10 degrees? Is there a reasonable expectation of	
the ability to correct the contracture?	
Is the contracture interfering or	
expected to interfere significantly with	
the patient's functional abilities?	
Is this going to be used as a	
component of a therapy program	
which includes active stretching of the	
involved muscles and/or tendons?	
Does the patient have plantar fasciitis?	
Does the patient have weakness or	
deformity of the knee that requires	
stabilization?	
Has the patient had a recent injury to	
or a surgical procedure on the knee?	
Is the patient ambulatory and has knee instability?	
Is the examination of the patient's joint	
laxity documented?	
Does the patient have flexion or	
extension contractures of the knee	
with movement on passive range of	
motion testing of at least 10 degrees?	
Is the need for a custom fabricated	
orthosis instead of a prefabricated orthosis documented?	
Is this to reduce pain by restricting mobility of the trunk?	
Is this to facilitate healing following an	
injury to the spine or related soft	
tissues?	

Is this to facilitate healing following a surgical procedure on the spine or related soft tissue? Is this to support weak spinal muscles and/or deformed spine? Has the patient had a mastectomy? Has the patient had breast reconstruction? Does the patient have a mastectomy form or silicone (or equal) breast prosthesis? Does the patient have a mastectomy form? Will the external breast prosthesis garment be used in the post-operative period prior to a permanent breast prosthesis or will it be used as an alternative to a mastectomy bra and breast prosthesis? Does the member have a mobility limitation that significantly impairs their ability to participate in one or more mobility-related activities of daily living (MRADL) in the home? Will the functional mobility deficit be sufficiently resolved by the use of the cane or crutch, and is the patient able to safely use a cane or crutch? Does the patient have a documented episode of ventricular fibrillation or a sustained, lasting 30 seconds or longer, ventricular tachyarrhythmia? Does the patient have familial or inherited conditions with a high risk of life-threatening ventricular tachyarrhythmia such as long QT syndrome or hypertrophic cardiomyopathy? Does the patient have either documented prior myocardial infarction or dilated cardiomyopathy and a measured left ventricular ejection fraction less than or equal to 0.35? Does the patient need to have a previously implanted defibrillator explanted? Does the patient have a diagnosis of Diabetes Mellitus? Within the last 6 months, has the patient had an in-person, video, or telephone visit with a physician, NP, or PA to evaluate their diabetes control?

Has the patient's treating practitioner concluded the patient (or the patient's caregiver) has training using the particular device prescribed as evidenced by providing a prescription for the appropriate supplies and frequency of blood glucose testing? Is the patient insulin treated? Does the patient have recurrent (more than one) level 2 hypoglycemic events (glucose <54mg/dL (3.0mmol/L)) that persist despite multiple (more than one) attempts to adjust medication(s) and/or modify the diabetes treatment plan? Does the patient have a history of one level 3 hypoglycemic event (glucose <54mg/dL (3.0mmol/L)) characterized by altered mental and/or physical state requiring third-party assistance for treatment of hypoglycemia Is the patient physically incapable of utilizing a regular toilet for at least one of the following situations: 1) confined to a single room, 2) confined to one level where there is no toilet, or 3) the home has no toilet facility? Bilateral or Lateral? Will the compression burn garment be used to treat hypertrophic scarring and joint contractures following a burn injury? Is this being requested to treat a wound caused by or treated by a surgical procedure or following a debridement or open venous stasis ulcer? For non-surgical wounds, was any type of debridement (surgical, enzymatic, mechanical, biological, autolytic) ever performed on this wound? Select all that apply for the members condition that this item is being requested for: Member has venous or lymphatic condition, as indicated by 1 or more of the following: CPAP or BIPAP request? Does the patient have any of the following? (Hover for info) Has the diagnosis been confirmed by polysomnography, either during an

inpatient hospital visit or sleep lab, or was OSA suspected at the time of discharge? Does the patient use on average 4 hours per night for a minimum of 70% of nights? Has there been a re-evaluation by the treating provider within 30-90 days from the initial request with documentation that includes symptoms of OSA are improved; and evidence of adherence to use of the device? What is being ordered? Is there record of the patient's need for a pump (i.e. gravity feeding is not satisfactory due to reflux or aspiration, severe diarrhea, dumping syndrome, administration rate less than 100 ml/hr, glucose fluctuations, gastrostomy/jejunostomy tube used)? What is the Administration/Delivery Method? Does the patient have full or partial non-function or disease of the structures that normally permit food to reach the small bowel, that will last at least 3 months? Does the patient have a disease that impairs digestion and/or absorption of an oral diet, directly or indirectly, by the small bowel, that will last at least 3 months? Does the patient's medical record include documentation stating why a standard formula cannot be used? What type of Device or Supply is being ordered? Does the patient have a covered cochlear implant or a bone-anchored hearing aid (BAHA)? Is this request for convenience or to upgrade to a newer technology? Is the current component obsolete or no longer supported? Is the current component no longer meeting the patient's needs? Has the patient had a formal evaluation of their cognitive and communication abilities by a speechlanguage pathologist (SLP)? Does the patient's medical condition result in a severe expressive speech

risson, warrys i (with 00000104)	
impairment?	
Can the patient's speaking needs be	
met using natural communication	
methods?	
Have other forms of treatment been considered and ruled out?	
Will the patient's speech impairment	
benefit from the speech generating	
device?	
Does the treating practitioner have a	
copy of the SLP's written evaluation	
and recommendation?	
Does the patient have an absence or	
shrinkage of an eye due to a birth	
defect, trauma, or surgical removal?	
Has the patient had more than 2 eye	
polishing services within this year?	
What is being ordered?	
Is the patient using a covered insulin	
pump?	
Does the patient vhave Diabetes	
Mellitus?	
Does the patient have C-Peptide level	
<110% (or has renal insufficiency w/C-	
peptide level <200%) & fasting sugar	
drawn at the same time <225 mg/dl?	
Does the patient have a positive Beta	
cell autoantibody test?	
Has the patient completed	
comprehensive diabetes education	
program, multiple daily insulin	
injections (3/day), frequent self-	
adjustments of insulin dose for at least	
6 months, has documented glucose	
self-testing at least 4x/day during the 2 months prior?	
· · · · · · · · · · · · · · · · · · ·	
Does the patient have HbA1c>7%, or history of recurring hypoglycemia, or	
wide fluctuations in blood glucose	
before mealtime, or "Dawn	
phenomenon" w/fasting blood sugars	
frequently >200mg/dL, or history of	
sever glycemic excursions?	
Has the patient been on an insulin	
pump prior to enrollment with plan	
and has documented frequency of	
glucose self-testing at least 4x/day (on	
average) during the month prior to	
enrollment?	
Does the patient have a medical	
condition that requires positioning of	
the body in ways not feasible with an	

v	risson, Manys I (Minn 0000104)
	ordinary bed due to pain, CHF, or
	chronic pulmonary disease?
	Does the patient have aspiration
	problems requiring head of bed
	elevation > 30 degrees and have a
	need for frequent changes in body
	positions, and/or an immediate need
	for a change in body position?
	Does the patient require traction
	equipment requiring attachment to a
	hospital bed?
	Are Hospital Bed accessories or a
	replacement mattress needed?
	Type of Accessories:
	Is this being provided for a patient-
	owned Hospital Bed?
	Does the patient require a trapeze to
	sit up because of a respiratory
	condition, to change body positions
	for other medical reasons, or to get in
	and out of bed?
	Does the patient have a condition that
	requires a safety enclosure that would
	be an integral part of a hospital bed?
	Is a bed cradle needed to prevent the
	patient from having contact with the
	bed coverings?
	Does the patient have a condition that
	requires bed rails?
	Is the patient confined to a bed?
	Does the patient's condition require a
	replacement mattress?
	Is this request for a Negative Pressure
	Wound Therapy pump or supplies?
	Does the patient have a chronic stage
	3 or 4 pressure ulcer, a neuropathic
	ulcer, venous or arterial insufficiency
	ulcer, or a chronic (being present for at
	least 30 days) ulcer of mixed etiology?
	Has the patient been appropriately turned and positioned, and has used a
	group 2 or 3 support surface, and has
	had their moisture and incontinence
	appropriately managed?
	Has the patient been on a
	comprehensive diabetic management
	program and has reduction in pressure
	on a foot ulcer been accomplished?
	Has the patient had compression
	badages and/or garments cosistnetly
	applied and have leg elevation and
	ambulation been encouraged?

Has wound therapy, with documented eval, care, & wound measurement by a medical professional, dressings to maintain a moist wound area, debridement of necrotic tissue, & provisions for adequate nutritional status been tried or considered & ruled out?

Does the patient have an ulcer or wound found in an inpatient setting, and after wound treatments have been tried or considered & ruled out, Negative Pressure Wound Therapy is used because the treating practitioner determines it is the best treatment?

Does the patient have complications of a surgically created wound or a traumatic wound where there is documentation of medical necessity for an accelerated formation of granular tissue which cannot be achieved by other available topical wound treatments?

Is the patient currently using a Negative Pressure Would Therapy pump?

Does the patient have angina pectoris in the absence of hypoxemia, dyspnea without cor pulmonale or the evidence of hypoxemia, severe peripheral vascular disease resulting in clinically evident desaturation in one or more extremities but the in absence of systemic hypoxemia, or a terminal illness that does not affect the ability to breathe?

The patient had a qualifying blood gas, performed by a treating practitioner or qualified provider during the patient's illness or within 2 days of discharge from a hospital (documented) & the provision of oxygen, in the home setting, will improve the condition?

Does the patient have an arterial PO2 at or below 55 mm Hg or an arterial oxygen sat at or below 88% taken at rest (awake) while breathing room air?

Does the patient have an arterial PO2 at or below 55 mm Hg, or an arterial oxygen sat at or below 88 %, taken during sleep for a patient who demonstrates an arterial PO2 at or above 56 mm Hg or an arterial oxygen sat at or above 89% while awake.

Does the patient have a decrease in arterial PO2 more than 10 mm Hg, or a decrease in arterial oxygen sat more than 5% from baseline sat, taken during sleep and associated with symptoms of hypoxemia?

Does the patient have an arterial PO2 at or below 55 mm Hg or an arterial oxygen sat at or below 88%, taken during exercise for a patient who demonstrates an arterial PO2 at or above 56 mm Hg or an arterial oxygen sat at or above 89% while at rest?

Does the patient have an arterial PO2 of 56-59 mm Hg or an arterial blood oxygen saturation of 89 percent?

Does the patient have dependent edema suggesting CHF, pulmonary hypertension or cor pulmonale, determined by measure of pulmonary artery pressure, gated blood pool scan, echocardiogram, or "P" pulmonale on EKG, or Erythrocythemia with a hematocrit > 56%?

Does the patient have the absence of hypoxemia and a medical condition with distinct physiologic, cognitive, and/or functional symptoms documented in high-quality, peerreviewed literature to be improved by oxygen therapy?

Oxygen Saturation or PaO2 level:

Measurement:

Date of oxygen saturation or PaO2

level measurement:

Testing Conditions:

Describe needed change:

Type of Pad or Mattress?

Is the patient completely immobile (i.e., the member can't make changes in the body position without assistance?

Does the patient have limited mobility (i.e., the member can't make changes in body position significant enough to alleviate pressure)?

Does the patient have one of these conditions; impaired nutritional status, fecal or urinary incontinence, altered sensory perception, or compromised circulatory status?

Does the patient have any stage pressure ulcer on the trunk or pelvis?

Does the paitient have multiple stage 2 pressure ulcers located on the trunk or pelvis which have failed to improve over the past month? Has the patient been on an ulcer treatment program including, a Group 1 support surface, assessment by a licensend healthcare professional, turning and positioning, wound care, moisture/incontinence control, nutritional assessment and invtervention? Does the patient have large or multiple stage 3 or 4 pressure ulcer(s) on the trunk or pelvis? Has the patient had a myocutaneous flap or skin graft for a pressure ulcer on the trunk or pelvis in the past 60 days and has been on a Group 2 or 3 support surface immediately prior to discharge from a hospital or nursing facility in the past 30 days? What type of Patient Lift or Transfer Device is being ordered? Does the patient need to be transferred between a bed and a chair, wheelchair or commode? Without the use of a lift, would the patient be conifined to a bed? Is this sling or seat being ordered as a replacement for a covered lift? Does the patient have severe arthritis of the hip or knee or have a severe neuromuscular disease? Is the seat lift mechanism being prescribed to effect improvement, or arrest or retard deterioration in the patient's condition? Is the patient completely incapable of standing up from a regular armchair or any chair in their home? Once standing, does the patient have the ability to ambulate? Have all appropriate therapeutic modalities to enable the patient to transfer from a chair to a standing position been tried already? What type of Pneumatic Compression is being ordered? Does the patient have lymphedema? Does the patient meet one or more of the following criteria (Check all that apply)

Is the patient's lymphedema
documented to be unresponsive to
other clinical treatment over the
course of a required four-week trial?
Does the patient have chronic venous
insufficiency with venous stasis ulcers
of the lower extremity?
Does the patient have all of the
following: edema in the affected lower
extremity; one or more venous stasis
ulcer(s); the ulcer(s) have failed to heal
after a six-month trial of conservative
therapy directed by the treating
practitioner?
Does the member have lymphedema
extending onto the chest, trunk and/or
abdomen that extends past the limits
of a standard compression sleeve?
Has the chest, trunk and/or abdominal
lymphedema has failed to improve
with a four-week trial?
What is being ordered?
Is this being ordered as a replacement
piece to a covered wheelchair?
Does the patient have a mobility
limitation that limits their ability to
participate in one or more MRADLs
within the home and that limitation
cannot be resolved with a cane or
walker?
Does the patient have sufficient upper
extremity function to self propel a
manual wheelchair in the home to
perform MRADLs?
Has the patient had a face to face visit
in the last 6 months?
Is this being ordered for use with a
covered brace?
Does the patient have chronic
obstructive lung disease, chronic
bronchitis, or emphysema?
Does the patient have a
neuromuscular disease?
Is the patient's condition causing a
significant impairment of chest wall
and/or diaphragmatic movement, such
that it results in an inability to clear
retained secretions?
Has the patient or caregiver received
appropriate training by a physician or
therapist?
Request Type:

verissori, iviarrys i (iviikiv 00000 104)	
Does the patient have Diabetes Mellitus?	
Does the patient have 1 or more of these conditions; amputation of other foot or partial of either foot, previous foot ulceration, pre-ulcerative callus, peripheral neuropathy with callus formation, foot deformity, or poor circulation, either foot?	
Has the patient had a face to face visit with the provider managing their diabetes care (and the members conditions are documented in their medical record), within 6 months of this order?	
Does the patient have a foot deformity that cannot be accommodated by a depth shoe?	
Is this to be used as part of a covered leg brace and is medically necessary for the propoer functioning of the brace?	
Is this prosthesis being used by the patient for treatment or rehab during an inpatient stay?	
Is this prosthesis reasonable and necessary for use by the patient in their home setting?	
Is this prosthesis being delivered to the patient no more than 2 days prior to a discharge from an inpatient stay, or to a patient who is not currently inpatient?	
Does the patient use of a respiratory suction pump to clear secretions?	
Does the patient have a tracheostomy?	
Is the patient on a ventilator? Does the patient have an orthopedic impairment requiring traction equipment which prevents ambulation during the period of use?	
Does the patient have a muskuloskeletal or neurological impairment requiring cervical traction equipment?	
Has the patient had demonstration of appropriate use of home cervical traction device and tolerated use?	
Does the patient meet one or more of the following criteria (Check all that apply)	
Does the patient have neuromuscular disease and chronic respiratory failure	

consequent to chronic obstructive pulmonary disease? Does the patient have a full thickness wound, wound with light to moderate exudate, or a wound that has talled or has not progressed toward a healing goal? Does the patient have a wound with heavy exudate, a third digree burn, or active vasculitis? Does the patient have a moderate to highly exudative full thickness wound or wound cavity? Is the patient sound covered with eschar? Is the gauze being used for dressing changes no more than 3 times per day for a dressing without a border and none per day for a dressing with a border? Does the patient have a stage 2 ulcer? Does the patient have a stage 2 ulcer? Does the patient have a stage 2 ulcer? Does the patient have a noderate sound with minimal or no exudate? Is the patient have a noder and none per day for a dressing with a border? Does the patient have a stage 2 ulcer? Does the patient have a node with light to moderate exudate? Does the patient have a nopen, partial thickness wound with minimal exudate or a closed wound? Is this beafier ulrently receiving Home Health Care? Type of Walker or Gait Trainer? Does the patient have a mobility limitation that significantly impairs the ability to participate in one or more mobility-related activities of daily living (MRAD), and will the deficit be resolved by the use of the device, and can the patient safely use the device? Is the patient unable to use a standard walker due to a severe neurologic disorder or other condition causing the restricted use of one hand? Are Walker Accessories needed? Type of Accessories:	
Does the patient have a full thickness wound orwound cavity? Is the patient's wound covered with each or you would with light to moderate exudate. The patient have a full thickness wound, wound with light to moderate exudate, or a wound that has stalled or has not progressed toward a healing goal? Does the patient have a wound with heavy exudate, a third dgree burn, or active vasculitis? Does the patient have a moderate to highly exudative full thickness wound or wound cavity? Is the patient's wound covered with eschar? Is the gauze being used for dressing changes no more than 3 times per day for a dressing without a border and once per day for a dressing without a border? Does the patient have a full thickness wound with minimal or no exudate? Does the patient have a valuate? Does the patient have a wound with light to moderate exudate? Does the patient have a wound with light to moderate exudate? Does the patient have a nopen, partial thickness wound with minimal exudate or a closed wound? Is this being used to hold wound cover dressings in place? Is this patient currently receiving Home Health Care? Type of Walker or Gait Trainer? Does the patient have a mobility limitation that significantly impairs the ability related activities of daily living (MRADL), and will the deficit be resolved by the use of the device, and can the patient safely use the device? Is the patient unable to use a standard walker due to a severe neurologic disorder or other condition causing the restricted use of one hand? Are Walker Accessories needed?	'
restrictive diseases and chronic respiratory failure consequent to chronic obstructive pulmonary disease? Request Type? 11550H, Ivially's 1 (WINN 00000104)
Is this being provided for a patient - owned walker?
Type of Request:
Can the patient's mobility limitation be
sufficiently resolved by the use of an
appropriately fitted cane or walker?
Does the patient's home provide
adequate access between rooms,
manuevering space, and surfaces for
use of a manual wheelchair?
Does the patient have a mobility
limitation that impairs their ability to
participate in mobility-related activities
of daily living (MRADLs) entirely?
Does the patient have a mobility
limitation that impairs their ability to
complete MRADLs in a reasonable
time frame?
Does the patient have a mobility
limitation that impairs their ability to
participate in MRADLs and would put
them at heightened risk of morbidity
or mortality secondary to the attempts
to perform the MRADLs?
Will use of a manual wheelchair
significantly improve the patient's ability to participate in MRADLs and
will they have expressed that they will
use it on a regular basis in the home?
Does the patient have sufficient upper
extremity function and other physical
and mental capabilities needed to
safely self-propel in a manual
wheelchair?
Does the patient have a caregiver who
is available, willing, and able to provide
assistance with the wheelchair?
Does the patient require a lower seat
height (17-18") because of short
stature or to enable them to place
their feet on the ground for
propulsion?
Is the patient able to self-propel in a
lightweight wheelchair, but cannot in a
standard wheelchair?
Is the patient able to self-propel the
wheelchair while engaging in frequent activities in the home that cannot be
performed in a standard or lightweight
wheelchair?
Does the patient spend at least 2
hours per day in the wheelchair and
require a seat width, depth, or height
roquire a seat many depart of height

ensson, Mariys I (MKN 00068164)
that cannot be accommodated in a standard or lightweight chair?
Does the patient have severe spasticity?
Does the patient have sufficient strength and postural stability to utilize a Rollabout chair?
Has the patient had an evaluation performed by a licensed/certified medical professional (LCMP), who has specific training and experience in rehab wheelchair evaluations and that documents the medical necessity and it's special features?
Is the wheelchair being provided by a Rehabilitative Technology Supplier that employs a RESNA-certified Assistive Technology Professional who specializes in wheelchairs and who has direct, in-person involvement in the chair selection for the patient?
